# UP2C UNI-PAC™ drum core power inductors

### **Applications**

- · Desktop computer
- Workstations/servers
- **DVD Players**
- Portable power devices
- Base stations
- Industrial power supplies
- Output filter chokes
- Test equipment instrumentation

## Environmental data

- Notes: (1) Open Circuit Inductance Test Parameters: 100 kHz, .250 Vrms, 0.0 Adc. (2) RMS current for an approximate ΔT of 40 °C without core loss, at an ambient temperature of +85 °C.
  - (3) Peak current for approximately 30% rolloff @ +20 °C

- (4) DCR limits +20 °C.
  (5) Applied volt-time product (V-us) across the inductor. This value represen \$1.1e applied v-us at 50 kHz necessary to generate a core loss equal to 10% of the letter to use for a 40 °C temperature rise.

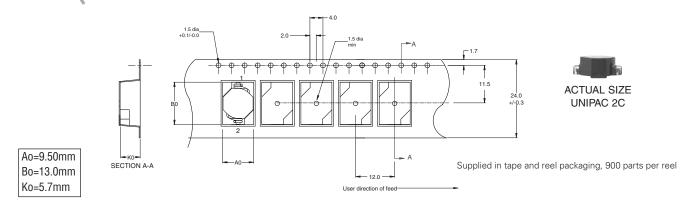

### **Dimensions-mm**

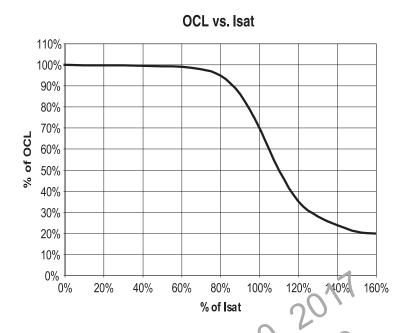

Dimensions in Nill meters. wwllyy = (date code) R = revision level xxx = -ino ictance value per nim y chart

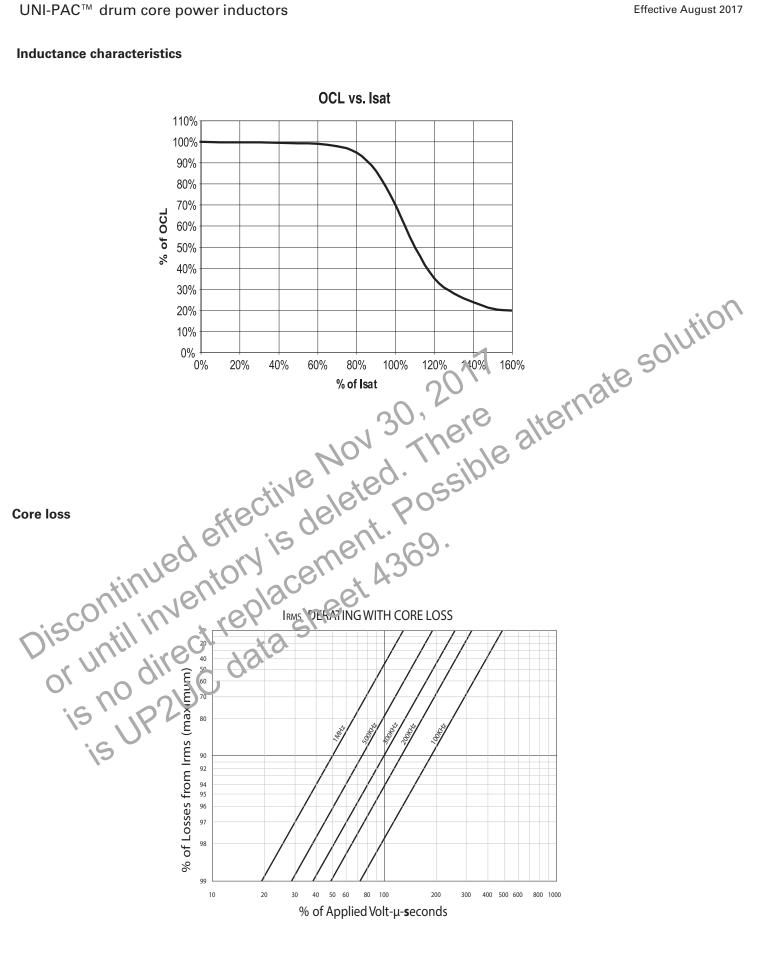

# (A) 2.5mm max is width of copper at seating plane. The width above the seating plane may exceed 2.5mm.
