

**L10P025D15 Information**

For Reference Only

**Part Number** [L10P025D15](#)  
**Manufacturer** Tamura  
**Category** Sensors, Transducers  
[Current Transducers](#)  
**Description** SENSOR CURRENT HALL 25A DC  
**Package** Module

**Certified Quality**

Heisener's commitment to quality has shaped our processes for sourcing, testing, shipping, and every step in between. This foundation underlies each component we sell.

**L10P025D15 Specifications**

|                          |                                                             |
|--------------------------|-------------------------------------------------------------|
| Manufacturer Part Number | <a href="#">L10P025D15</a>                                  |
| Manufacturer             | Tamura                                                      |
| Category                 | Sensors, Transducers<br><a href="#">Current Transducers</a> |
| Package                  | Module                                                      |
| Series                   | -                                                           |
| For Measuring            | DC                                                          |
| Sensor Type              | Hall Effect, Open Loop                                      |
| Current - Sensing        | 25A                                                         |
| Number of Channels       | 1                                                           |
| Output                   | Ratiometric, Voltage                                        |
| Sensitivity              | -                                                           |
| Frequency                | DC ~ 50kHz                                                  |
| Linearity                | ±1%                                                         |
| Accuracy                 | ±1%                                                         |
| Voltage - Supply         | ±15V                                                        |
| Response Time            | 5µs                                                         |
| Current - Supply (Max)   | 12mA                                                        |
| Operating Temperature    | -10°C ~ 80°C                                                |
| Polarization             | Unidirectional                                              |
| Mounting Type            | Through Hole                                                |
| Package / Case           | Module                                                      |

## L10P025D15 Guarantees

### Quality Guarantees

We provide 90 days warranty. \*

If the items you received were not in perfect quality, we would be responsible for your refund or replacement, but the items must be returned in their original condition.

### Service Guarantees

We guarantee 100% customer satisfaction.

Our experienced sales team and tech support team back our services to satisfy all our customers.

## L10P025D15 Payment Methods

## L10P025D15 Shipping Methods

If you have any question about L10P025D15, please do not hesitate to contact us!
